# EXEPTIONAL WATER TREATMENT PRODUCTS

Aquatek provides a highly versatile and customizable line of water products. From water softeners & media filters to housings & reverse osmosis systems, whatever your water treatment needs are, Aquatek has a solution. Aquatek products are assembled in the United States with the highest quality, industry leading parts and components. Built to last and engineered to exacting specifications.

## United Water Inc

At United Water, our mission is providing our customer the best options the water treatment industry has to offer. Our brand, AQUATEK, features a continuously growing line up of top-quality residential, commercial and industrial water treatment systems and filtration products. We strive for excellence and product consistency to keep our customers satisfied. With over 30 years of experience, United Water, provides big business resources, knowledge and expertise with a customer focused personal approach. Headquartered in Vancouver, WA, serving the Pacific Northwest and beyond, United Water is your clean water resource.

Troy Stockdale founded United Water in January 2013. Starting the business out of his garage it grew fast and Troy moved the company into their first warehouse in July 2013. United Water has since moved twice to larger warehouses and offices as the company continues to grow.

Troy brings years of experience and a vast knowledge of water filtration design to the business. In 1992 he started at a Culligan dealer in San Diego as a Service Technician and quickly moved up to Manager. He then went on to work for Applied Membrane and continued to expand his knowledge as a Commercial/Industrial Design Engineer. From 1999 to 2012 Troy was with CUNO/3M as the West Coast Regional Sales Manager for the Residential & Commercial divisions.

With Troy's knowledge of the market, United Water Inc. has grown to be a well-recognized manufacture and distributor of high-quality professional filtration products to plumbing wholesalers, home builders, contractors, and residential customers.

## Polymeric ULTRAFILTRATION!

Aquatek ATPUF-12 Poly-Ultrafiltration system offers 0.02-micron filtration at maximum service flow rates of 12 gal per minute (gpm). The UF treats colloids, bacteria, cysts, viruses, turbidity, tannins and other particles, and can be utilized as a final polishing stage or in water reclamation systems for rainwater or grey water, along with offering protection during power outages and intermittent power.

The back washable system allows for multiple standard 2.5-in. top inlet connections, from standard back washable control valves to in/out heads, and comes standard with a bottom drain opening for ease of drainage and cleaning purposes of the vessel.

## NOW OFFERING High Quality SOFTENER SALT!

Discover the perfect solution for water softening with our premium Water Softener Salt. Choose from three exceptional options to suit your needs: Coarse Solar Crystals for efficient performance, Clean Choice Pellets for easy of use, or Iron Combat Pellets for tackling stubborn iron content. Enjoy the benefits of softened water effortlessly with our high-quality salt options. Pallets available for NACL-40 Coarse Solar Crystals & NACL-40-P Clean Choice Pellets.

Contact us for pallet qty. rates & shipping options!

## Spin Down, Sediment Trap Filters, & Smart Ball Valve

Discover optimal sediment removal with Rusco's Spin Down Sand Trap Filters, now available in convenient 1" PVC Slip and 1.5" PVC Slip sizes. Engineered for efficiency, these filters effectively capture sand, sediment, and debris before reaching your system, ensuring cleaner water for your applications. Enhance your maintenance routine with the 1/2 Smart WiFi Ball Valve, seamlessly integrated to automatically flush your filter, promoting longevity and sustained performance. Trust Rusco for reliable sediment filtration solutions, offering a combination of precision engineering and smart technology to keep your water systems clear and functioning at their best. Upgrade to Rusco for a seamless blend of quality and innovation in sediment control.

## Wireless Salt Sensor | ADD to ANY Water Softener

A smart, level-sensing device specifically designed for your water softener. Get low salt level alerts, check your salt levels from your phone, and never run out of salt again. The EZsalt Sensor connects to Wi-Fi to deliver low salt alerts to your smartphone, wherever you are. Customize your alerts to send at a certain salt level and choose how you prefer to be notified. In areas where salt delivery is available, you can share your salt readings with a local company so they can deliver salt to you before you ever run out.

## SMART Softener Systems From DROP

At the heart of the DROP Water Management System is the DROP Hub, a device that seamlessly communicates with all aspects of your home's water system. It integrates all your DROP water treatment devices such as water softeners and filters, together with pumps, flow meters, valves, leak detectors, and more. Each home requires one Hub and each Hub can control 100s of DROP devices. Leak protection: Our DROP Leak Detector units allow our home water softener systems to monitor water usage for indications of leaks. When leaks are detected, the system is alerted and water is shut off, preventing untold damage to the home.

# AQUATEK

INNOVATIVE WATER PRODUCTS

## WATER SOFTENING SYSTEMS

Hardness or softness refers to the concentration of dissolved minerals—namely calcium and magnesium—found in water. Hard water has a high proportion of these minerals, and though they aren't dangerous to your health, they do leave behind a residue called scale. Scale can build up in pipes and leave a film on your hair and skin. Hard water can also make soaps and detergents less able to lather, leave sediment behind in your water heater, and dry out your skin.

### AQUATEK WATER SOFTENER MODELS:

- ◆ **Aquatek ATWS-BT** BLUETOOTH Connected Series of softeners features simple set up through a Bluetooth® App.
- ◆ **Aquatek ATWS Two Tank & Cabinet** Water Softeners are proudly manufactured and assembled in the USA with NSF® certified components and feature industry leading, high-quality components.
- ◆ **Aquatek ATWS-C & ATWS-CC Carbon Combo Softeners** These speciality systems combine two units into one providing an economical option for improved taste, odor reduction and the removal of Chlorine with -C models (Coconut Shell Carbon) or Chloramine with -CC models (Centaur Carbon). Removing these contaminants adds longevity to the water softener and helps keeps maintenance costs lower over time.
- ◆ **Aquatek ATWS-HI** High Iron Softeners utilize speciality resin with Shallow Shell Technology that has been proven to significantly reduce iron fouling of softener resin. *Mineral Cleaner & 5 Micron Sediment Filter Recommended*
- ◆ **ATTWS TANNIN** - Media type: Cation / Tannin | **ATNWS Nitrate** - Media type: Cation / Nitrate specific
- ◆ **Aquatek ATTAWS** Twin Alternating Systems provide no interruptions in flow of soft water.

Maximum Hardness 50 gpg | Pressure Range: 40-100psi

## Anion Arsenic Reduction System

Aquatek AT\*\* Elevate your water quality with our comprehensive Anion Arsenic Reduction System. This system comes complete with an anion water softener for effective arsenic reduction, a chemical dosing pump, a solution tank, an in-line mixing valve for optimal mixing, and a pre-wired 1" flow switch for hassle-free installation.

Complete System Includes:

- ◆ Aquatek ATAWS Water Softener
- ◆ Aquatrol ADP-01141-1 Chemical Dosing Pump
- ◆ Aquatek ST-15 Chemical Solution Tank 15-gallon
- ◆ In-line Mixing Valve - MIXER-10150-SINGLE-INJ05
- ◆ 1" Pre-Wired Flow Switch - M310-100-PW

Stage 1: NP-RFG20BB	20" Radial Flow Carbon Filter Cartridge				\$101.18
Stage 2: ATRFIRC20-BB	20" Radial Flow Iron Reduction Cartridge				\$315.33

Ozone AIO<sub>3</sub> Disinfecting Iron, Sulphur & Manganese ATAIO3 Systems

Aquatek ATAIO3 Series Ozone Systems provide a highly versatile solution to your treatment needs. Ozone is a triatomic oxygen (O<sub>3</sub>) which has high oxidation capabilities. Ozone is the most effective and rapidly acting primary disinfectant for media bed available. Along with disinfection, the use of ozone for drinking water treatment has many other benefits such as improved taste and color removal, iron, manganese and sulfur removal. Ozone's high oxidation potential gives it excellent germicidal properties. Ozone is 52% stronger than chlorine, and will oxidize much more rapidly without the use of harsh chemicals.

Maximum Iron 20 ppm | Maximum Hydrogen Sulfide 10 ppm | Pressure Range: 40-100psi

MODEL	FLOW RATE	BACKWASH RATE	PIPE SIZE.	ELEC.	MEDIA BED	MINERAL TANK DIM.	SYSTEM DIM.	PACK WT.	LIST

BACTERIAL IORN

Standard "All In One" AIO<sub>2</sub> Iron, Sulfer & Manganese ATAIOIF Systems

Aquatek ATAIOF Series Filters reduce Iron, Hydrogen Sulfide (sulfer) & Manganese "All In One" filtration system. All natural and chemical free media bed provides excellent depth filtration of precipitated iron while increasing pH to enhance iron reduction performance. These systems utilize an air chamber within the tank to oxidize and capture the elements before filtering through the media bed.

Maximum Iron 10 ppm | Maximum Hydrogen Sulfide 2 ppm | Pressure Range: 40-100psi

MODEL	FLOW RATE	BACKWASH RATE	PIPE SIZE.	ELEC.	MEDIA BED	MINERAL TANK DIM.	SYSTEM DIM.	PACK WT.	LIST
ATAIOIF-1.0	6	5.3	1" NPT Elbow	120v. 60Hz	ZeoLite	9 x 48	12 x 12 x 58	150lbs	\$1,234.55

IRON & SULFUR

Aquatek ATCBF-AS "Four In One" Arsenic, Iron, Manganese & Sulfur Systems

Aquatek ATCBF-AS system can effectively treat Arsenic (As III & As V), Iron, Manganese and Hydrogen Sulfide. The oxidative chemical locked inside CR-26 beads removes arsenic using metal-oxide nano-particles that are precipitated within the resin bed where they form very strong chemical bonds with arsenite (As III) and arsenate (As V). The media is regenerated via the dissolved oxygen in the backwash water. This means chemicals such as chlorine dioxide, potassium permanganate, chlorine or sodium chloride brine solution are not needed for regeneration. *Please note, trace ammounts of metals required in water being treated.*

Minimum Iron 0.2 ppm | Pressure Range: 40-100psi

ARSENIC & IRON

AQUATEK ATUN-Series Up-Flow pH Neutralizers

Aquatek ATUN-Series Up-Flow Neutralizers help to mitigate & neutralize pH. Featuring a translucent tank for quickly viewing media fill level. Designed for continuous backwashing during use. No control valve, no drain line, or electricity required. Water flows into your home from a well or municipal water system and into the tank. Calcium carbonate is commonly used to neutralize acids, and as the calcite is slowly dissolved into the acid water, it raises the pH.

*Aquatek Water Softener recommended.*

MODEL	FLOW RATE	PIPE SIZE.	PSI	MEDIA BED	TANK DIM.	SYSTEM DIM.	PACK WT.	LIST

## AQUATEK ATCBF-Series Custom Backwashing Filters

### MEDIA OPTIONS & USES:

COCONUT SHELL CARBON	CENTAUR CARBON	CALCITE	pH NEUTRALIZER
Chlorine, Taste, Odor	Chloramine, Hydrogen Sulfide/Sulfur	pH Adjustment Above 6	pH Adjustment Below 6

Aquatek ATCBF Backwashing water filters are highly versatile tank & valve style filters which, depending on desired results and media choice, can provide a wide variety treatment options. Backwashing consists of reversing the flow of water so that it enters from the bottom of the filter bed, lifts and rinses the bed, then exits through the top of the filter tank. Aquatek custom backwashing filters are designed & built to meet the costumers needs. (see Filtration Media Options below)

## Drinking Water Systems

### HDG-U3000-UF 3-Stage Ultrafiltration Drinking Water System

The HDG-U3000-UF incorporates Microban® antimicrobial technology, which inhibits the growth of bacteria which can cause odors and the fouling of the filter surface. Any of the filters in the "HDG" line can be used in this system. Installation is easy and system contains the majority of the material needed for installation

**ELF 1M-C Lead Reduction Cartridge**  
Commercial and Residential Drinking Water Systems, Pre- and Post- R.O. Filtration, Water Coolers, Food Service

**BGDWS-1500-FF & BGDWS-HFF**  
These Drinking Water Systems utilize one of two popular BevGuard® SQC Cartridges. Each contains a 0.5 micron compressed carbon block and polyphosphate scale inhibitor.

# AQUATEK Reverse Osmosis Drinking Water Systems

Daily Production 50 GPD | Micron 0.0005 | 3.2 Gallon Storage Tank

Aquatek ATPRO-Series keeps your drinking water clean and safe and reduces the levels of lead, nitrates, cysts (cryptosporidium, giardia), arsenic, sodium and other contaminants commonly found in unfiltered tap water. If other systems are just base models, the Aquatek ATPRO-Series series comes very well equipped with features other water systems simply don't offer.

Aquatek ATRO-Series REVERSE OSMOSIS (RO) is one of the most convenient and economical methods of reducing unwanted contaminants in your drinking water. These systems provide up to 50 gallons per day (GPD) of clean, clear, refreshing drinking water for residential and light commercial use.

ICF-2512-ALK Upgrade & enjoy the numerous health benefits of Alkaline Water and upgrade ANY Aquatek Reverse Osmosis system with our inline Alkaline filter (ICF-2512-ALK) to provide you with an endless supply of Alkaline Water at home.

## Designer Faucets

LF Series Designer Faucets have two primary options/differences - Air Gap & Non Air Gap. If you have a reverse osmosis unit, we recommend using an air gap faucet. We also recommend that you check your local plumbing codes as some will require Air Gaps.

NON AIR GAP	DESCRIPTION	FINISH	LIST	AIR GAP	DESCRIPTION	FINISH	LIST
LF-EC32-CP	Designer Ceramic Disk, non air gap	Chrome	\$76.69	LF-EC32-CPAG	Designer Ceramic Disk, with air gap	Chrome	\$91.06
LF-EC32-BN	Designer Ceramic Disk, non air gap	Brushed Nickel	\$98.59	LF-EC32-BNAG	Designer Ceramic Disk, with air gap	Brushed Nickel	\$112.92
LF-EC25-CP	Designer Ceramic Disk, non air gap	Chrome	\$98.08	LF-EC25-CPAG	Designer Ceramic Disk, with air gap	Chrome	\$124.44
LF-EC25-BN	Designer Ceramic Disk, non air gap	Brushed Nickel	\$116.41	LF-EC25-BNAG	Designer Ceramic Disk, with air gap	Brushed Nickel	\$128.80
LF-EC25-ORB	Designer Ceramic Disk, non air gap	ORB	\$121.95	LF-BLRAG	Reverse Osmosis with air gap	Chrome	\$68.52
LF-LR-STND	Standard long reach, non air gap	Chrome	\$40.77	LF-BLRAG-BN	Reverse Osmosis with air gap	Brushed Nickel	\$88.48
LF-BLR-BN	Standard long reach, non air gap	Brushed Nickel	\$73.33				

# AQUATEK's Sodium Free Scale Prevention Options

## NSPS-Series Scale Prevention Systems

### FEATURES

*A GREEN Alternative to Conventional Water Softening*

- Maintenance free - no electricity, cost for salt, additional water usage or regeneration material needed
- A **GREEN** alternative to traditional water softening
- Filtersorb SP3 Media prevents the negative effects of calcium & magnesium on your plumbing and appliances while allowing the positive health benefits of the minerals to remain in your drinking water.

### Complete System Contents:

- ENPRESS® Vortech™ Pressure Vessel
- Riser Tube (Pre-Installed)
- Filtersorb SP3 Filter Media (May be Pre-Installed)
- C-Series In/Out Tank Head
- C-Series Bypass
- 1" NPT Plumbing Adapters
- C- Series Wrench
- 1" x 10" Filter Housing for 8", 9" and 10" Tanks
- 10" GAC Carbon Pre-Filter for 8", 9" and 10" Tanks
- 1" x 20" Filter Housing for 12" & 13" Tanks
- 20" GAC Carbon Pre-Filter for 12" & 13" Tanks
- Filter Housing Wrench
- Wall Mount Bracket for Big Blue Housings

Maximum Hardness 80 gpg | Maximum Iron 0.3 ppm (Clear) | Maximum Manganese 0 ppm

## ATSS-Series Tankless Scale Reduction Systems *Ideal for Tankless Water Heaters*

Aquatek ATSS-Series utilize SLOW PHOS® which is a form of slowly soluble polyphosphate in small glassy beads which has been engineered to dissolve at a slow controlled concentration to inhibit scale formation and corrosion. Benefits include scale prevention, corrosion inhibition, & Iron control.

	MODEL	FLOW RATE	IN / OUT CONNECTION	PSI LIMIT	TEMP LIMIT	DIMENSIONS	PACK WT.	LIST

## ST-Series ScaleTek High-Flow Scale Control & Conditioners

ScaleTek has unlocked the issue of Hard Water Scale with a revolutionary patent pending media. The technology behind this filter media is quite simple. By using this media, we are able to treat the Carbonate portion of hard water therefore delivering Scale Controlled water throughout the home or office.

	MODEL	MAX HARDNESS	FLOW RATE	IN / OUT CONNECTION	PSI LIMIT	TEMP LIMIT	DIMENSIONS	PACK WT.	LIST
COMPLETE SYSTEM	ST-SCS1	25 GPG	10	1"	100 psi	100° F max	17 x 7	8 lbs	\$412.25
	ST-SCS2	25 GPG	18	1.5"	100 psi	100° F max	27 x 7	14 lbs	\$486.73

## Chemical Injection Systems

These streamlined solutions deliver precise chemical dosing for superior water quality across diverse applications. Rely on our efficient systems for enhanced control and performance, simplifying the process of maintaining water purity and safety.

MODEL	DESCRIPTION	LIST
ADP-01141-1	Aquatrol Chemical Dosing Pump, 38gpd max, 110v	\$478.52
MIXER-10150-SINGLE-INJ05	In-line chemical mixer. 1" x 15" with 1/2" FIPT infection port	\$301.60
M310-100-PW	1" Pre-wired flow switch	\$771.44
ST-15	15 Gallon Chemical Solution Tank	\$105.20
ST-35NSF	30 Gallon Chemical Solution Tank NSF Certified	\$274.76

## Ultraviolet Disinfection Systems

Aquatek UVA-418-S22 water disinfection system offers an economical and chemical-free way to ensure potability and safeguard your drinking water in most residential and light commercial applications. Perfect for applications up to 18 gpm and with the 3 stages of treatment addresses taste and quality, odor, turbidity, chlorine reduction and utilizing the power of Polaris UV technology to sterilize and protect against harmful bacteria and viruses.

UVA-418-S22

Polaris Ultraviolet Systems

## Non-Electric Chlorine Pellet Feeder

MODEL	DESCRIPTION	LIST
FEEDER-400	Model 400 non-electric chrone pellet feeder.	\$464.04

## AQUATEK Wholehouse Chemical Filtration

- **PFAS & PFOA Reduction**
- **Filter Volatile Organic Compounds (VOCs)**
- **Chlorine & Chloramine\***
- **Improve Taste**
- **Odor Reduction**

**Aquatek Chemical Filtration** Introducing Aquatek’s state-of-the-art chemical filtration solutions tailored for PFOS and PFOA contaminants. Choose the good ATC802-CHEM for cost-effective granular activated carbon filtration, the better ATDC802-CHEM for dual filtration cartridges and more capacity, or the best **EP-PIONEER-CHEM** for advanced carbon block filtration and an impress 100k gallon capacity. Whether in industrial, municipal, or residential settings, Aquatek ensures unparalleled water purity, safeguarding your community and environment with reliable and efficient PFOS and PFOA filtration technologies.

	MODEL	EST. FLOW RATE	CAPACITY	PIPE SIZE.	ELEC.	REPLACEMENT CARTRIDGES	SYSTEM DIM.	LIST

## Spin Down, Sediment Trap Filters, & Smart Ball Valve

Discover optimal sediment removal with Rusco’s Spin Down Sand Trap Filters, now available in convenient 1" PVC Slip and 1.5" PVC Slip sizes. Engineered for efficiency, these filters effectively capture sand, sediment, and debris before reaching your system, ensuring cleaner water for your applications. Enhance your maintenance routine with the 1/2 Smart WiFi Ball Valve, seamlessly integrated to automatically flush your filter, promoting longevity and sustained performance. Trust Rusco for reliable sediment filtration solutions, offering a combination of precision engineering and smart technology to keep your water systems clear and functioning at their best. Upgrade to Rusco for a seamless blend of quality and innovation in sediment control.

	MODEL	DESCRIPTION	PIPE SIZE.	MICRON	MESH	LIST

## Filter Selection Guide

### ATRFIRC20-BB Iron Reduction Cartridge

The NEW ATRFIRC20-BB radial flow Iron reduction filter effectively reduces up to 3 PPM of dissolved iron from water. The ATRFIRC20-BB improves the metallic taste caused by iron and will reduce the orange & brown staining found in your sink, toilet, tub, and other plumbing fixtures. Another great feature of this ATRFIRC20-BB filter is that it doesn't add any harmful chemicals to your water so you can use it for drinking water applications as well. This iron water filter should be installed on the main cold water line after the pressure tank or water meter.

## Sediment Cartridges | *3 Tiers of Filtration* | DIRT & RUST REDUCTION

### MELT BLOWN MB-SERIES | 175° F Max

Offering the highest level of sediment & particulate filtration Melt Blown Cartridges are manufactured from 100% Polypropylene construction offering excellent filtration and good thermal stability. The unique density gradient construction maximizes efficiency and minimizes pressure drop. This filter will not impart taste, odor, or color to the filtered product and has superior chemical resistance for process fluid applications.

#### APPLICATIONS

- Potable Water
- Pre Filters for Reverse Osmosis Filters
- Home Water Filtration
- Swimming Pools & Hot Tubs

### PLEATED PS-SERIES | 180° F Max

The 2nd best option for removing sediment standard Efficiency Pleated filter cartridges are manufactured with special non-cellulose fabric which provides excellent resistance to bacterial and chemical attack. Synthetic polyester fabric pleated around a durable polypropylene core with a long service life and reduced maintenance costs.

#### APPLICATIONS

- Drinking Water
- Reverse Osmosis Prefiltration
- Food and Beverage
- Cosmetics
- Electronics

### STRING WOUND SWC-SERIES | 180° F Max

Highly effective in certain applications the 3rd option String Wound Depth Cartridges are made with 100% Polypropylene cord utilizing a precision winding pattern giving them high dirt-holding capacity reducing sand, silt, rust, and scale.

#### APPLICATIONS

- Water
- Fuels & Light Oil
- Water Glycols
- Mineral and Synthetic Oils
- Lubricants & Solvents

## Carbon Cartridges | CHLORINE TASTE & ODOR

Radial Flow  
NPRFG-Series  
Carbon Filter

Carbon Block  
CB-Series  
Carbon Filter

Carbon  
HDG-P117  
(Aqua-Pure API17  
Compatible)

### RADIAL FLOW NPRFG-SERIES | 125° F Max

Utilizing Coconut Shell Granular Activated Carbon (GAC), these are ideal for point-of-entry and other high flow rate applications.

### CARBON BLOCK CB-SERIES | 180° F Max

Eco-friendly activated coconut shell carbon filter media to provide purer filtration and high level of chlorine taste and odor reduction

### CIC-BB20SM Sub-Micron Carbon Impregnated Cartridge

The NEW **CIC-BB20SM** combine the benefits of carbon block filters and sub-micron sediment filtration. Offering users a high performance alternative and a great cost to benefit ratio.

- Chlorine, Taste, Odor & PFOS / PFOA Reduction
- Features carbon impregnated filter fibers for optimal performance
- Removes sediment, sand, silt and rust from water
- Removes particles down to 0.5 microns
- Can be used in residential and commercial applications
- Constructed with high grade FDA approved materials
- Demonstrates low pressure drop characteristics throughout the lifespan of the filter
- Non-proprietary design fits most housings that accept a 4-1/2" X 20" drop-in cartridge

## UNITED WATER COMMERCIAL &amp; INDUSTRIAL

# AQUAOTEK

COMMERCIAL & INDUSTRIAL PRODUCTS

## INDUSTRIES:

- **HOSPITALITY**
- **FOOD & BEVERAGE**
- **WINERIES, BREWING FACILITIES, DISTILLERIES**
- **HOSPITALS & MEDICAL LABORATORIES**
- **APARTMENTS, RETIREMENT HOMES, LARGE RESIDENTIAL FACILITIES**
- **SCHOOLS & UNIVERSITIES**
- **MANUFACTURING**
- **RESORTS & HOTELS**
- **AGRICULTURE**
- **BIO-TECH**
- **MUNICIPAL WATER SYSTEMS**

At our United Water, collaborating with our customers to custom design commercial water treatment systems for any application is at the core of what we do. We understand that each client's needs are unique, which is why we prioritize working closely with them every step of the way. From the initial consultation to the final implementation, we offer comprehensive support to ensure that the system meets their specific requirements. Our team assists with sizing considerations and creating detailed schematics tailored to each system. We can provide thorough water testing to determine the most effective treatment methods. If necessary, we also provide access to laboratory testing to further refine the system's design and performance.

Moreover, our commitment to customer satisfaction extends beyond the design phase. We pride ourselves on offering top-notch customer service for system startup and ongoing maintenance. Our experts are readily available to address any concerns or issues that may arise, providing timely diagnoses and solutions to keep the water treatment system operating optimally. Whether it's troubleshooting unexpected challenges or fine-tuning the system for peak efficiency, we're dedicated to supporting our customers every step of the way, ensuring their water treatment needs are met with the highest standards of quality and reliability.

In essence, our approach to working with customers on custom-designed commercial water treatment systems encompasses a comprehensive blend of expertise, collaboration, and ongoing support. By prioritizing open communication, tailored solutions, and responsive service, we strive to not only meet but exceed our clients' expectations, delivering solutions that address their unique water treatment needs effectively and reliably for the long term.

Choosing the correct system can be a complex task and we are here to help provide you with the information you need to make the right choice for any commercial and industrial application. **Call 877-414-7873**

# AQUATEK AT-Series Commercial Media Filters

- Features**
- Four solid state microprocessors
  - Fully adjustable cycle sequencing controller
  - Coin cell lithium battery back-up with 24 hour carry over

Aquatek ATAIOF Series Filters reduce Iron, Hydrogen Sulfide (sulfur) & Manganese “All In One” filtration system. All natural and chemical free media bed provides excellent depth filtration of precipitated iron while increasing pH to enhance iron reduction performance. These systems utilize an air chamber within the tank to oxidize and capture the elements before filtering through the media bed.

## AQUATEK ATAIOF SERIES COMMERCIAL IRON FILTER SYSTEMS

Maximum Iron (Fe): 20 PPM | Max. Hyrdogen Sulfide: 2 PPM

## AQUATEK ATCBF SERIES COMMERCIAL CARBON FILTER SYSTEMS

Aquatek ATCBF Backwashing water filters are highly versatile tank & valve style filters which, depending on desired results and media choice, can provide a wide variety treatment options. Backwashing consists of reversing the flow of water so that it enters from the bottom of the filter bed, lifts and rinses the bed, then exits through the top of the filter tank. Aquatek backwashing filter control valves and media tanks are programmed filled to desired customer needs (see *Filtration Media Options* below).

# AQUATEK ATRO-Series Commercial Reverse Osmosis Systems

## ATRO-600G & ATRO-300G Reverse Osmosis Systems

Aquatek ATRO-300/600G Commercial RO System keeps your drinking water clean and safe and reduces the levels of lead, nitrates, cysts (cryptosporidium, giardia), arsenic, sodium and other contaminants commonly found in unfiltered water. The easy to install system comes with everything you need. These high capacity units are available in both 300 gallon per day (gpd) and 600 gpd models.

MODEL NUMBER	DAILY PRODUCTION RATE	RECOVERY RATE	MAX. HARDNESS	TEMP RANGE	SALT REJECTION	PSI	PH RANGE	TDS	LIST PRICE

# Tritton IXC-Series Commercial Reverse Osmosis Systems

The TRITTON IXC RO Systems are designed to operate with high productivity, automatic operation and low maintenance. Built in a vertical module using cutting-edge technology materials and accessories at a lower investment cost that will give a greater competitive advantage.

Multiple membrane options, make it a versatile system in the range of flow from 2,100 to 9,600 GPD and with 99% rejection of minerals.

- Systems come ready to be placed into immediate operation with no programming needed
- TDS on Display - Shows the quality of product water in TDS PPM being obtained at that time.
- Multiple membrane options are available
- Modifying an IXC system by adding additional membranes is simple and a value added solution for customers who might outgrow their system

MODEL NUMBER	GALLONS PER DAY	PROD-UCT	FEED FLOW	RECOVERY %	PRESSURE PUMP	CONNECTIONS			ELEC.	SYS. DIM.	LIST PRICE

\* The system production rate is based on minimum feed water quality below 1,000 PPM, feed water temp 77 °F, and SDI < 5. Use a suitable pretreatment capable of removing all membrane damaging substances.

## TRITTON ROS-IXC-850 Compact RO System

The TRITTON IXC 850 designed to be highly productive, easily maintained & operated, with all the quality of the IXC-series in a compact & affordable version. Its horizontal membrane design combines high quality components and accessories while keeping in mind the importance of cost to benefit ratio.

Although light weight and compact, IXC-850's have been designed for ease of maintenance and installation. They offer a high performance, low pressure Hydron™ membrane for 98% rejection and a production range of 850 - 1000 gpd\*.

MODEL NUMBER	DAILY PRODUCTION RATE	MEMBRANE	OPERATING PRESSURE	CAPACITY ROTARY PUMP	IN/OUT CONNEC-TION	ELEC.	Sys. DIM.	LIST PRICE
ROS-IXC-805	850-1000*	4" x 21" (1)	100-150psi	100 gph	1/2"	120V/60Hz	26 x 23 x 20	\$4,672.95

\* Depending on feed water characteristics through the 4 stages of filtration. The system production rate is based on minimum feed water quality below 1,000 PPM, < 300 PPM hardness, feed water temp 77 °F, and SDI < 5.

## Stainless Steel Commercial Filter Housings

### HydroScientific™ BF-Series Swing Bolt Bag Filter Housings

HYDROSCIENTIFIC™ BF SERIES BAG FILTER HOUSINGS are ideal for most commercial / industrial applications. Commonly used for pre-filtration for Reverse Osmosis (RO) systems, food service, car washes, agriculture and many other uses.

HYDROSCIENTIFIC™ BF SERIES BAG FILTER HOUSINGS are made with high grade 304 or 316 Stainless Steel and easily accept most standard filter bags. With a wide range of models, these housings can easily meet most application requirements

Max. Pressure: 150 psi at 300 °F | Max. Temp. 300 °F

### Features

- 304 or 316 Stainless Steel
- Positive )-Ring Seal
- Electropolish standard on all models
- Accepts #1 (7" x 16.5") or #2 (7" x 32") Filter Bags
- 150 PSI Pressure Rating

MODEL NUMBER	DESCRIPTION	IN / OUT	VENTS	GAUGE PORT	MAX FLOW	LIST

## HydroScientific™ MRH/MRHS-Series Swing Bolt Housings

HYDROSCIENTIFIC™ MRH / MRHS SERIES - SWING BOLT MULTI ROUND FILTER HOUSINGS are ideal for most industrial/commercial applications with our welded leg design as a standard, (not "optional") feature, we eliminate the added expense to your application. MRH/MRHS Swing Bolt Multi Round Housings are commonly used for pre- filtration for Reverse Osmosis (RO) systems, food service, car washes, agriculture and many other uses. HYDROSCIENTIFIC™ MRH / MRHS SERIES - SWING BOLT MULTI ROUND FILTER HOUSINGS are made with a high grade 304 or 316 Stainless Steel as standard and accept a wide range of filter cartridges.

Max. Pressure: 150 psi at 300 °F | Max. Temp. 300 °F

## HydroScientific™ SCICLONE SC-Series Housings

HYDROSCIENTIFIC SCICLONE™ SERIES SS FILTER HOUSING provide an exceptional performance housing design that helps separate dense solids prior to water passing through the filter cartridge. This SCICLONICTM design delivers extended filter life, low cost operation, increased dirt holding capacity and reduced maintenance costs.

HYDROSCIENTIFIC SCICLONE™ SERIES SS FILTER HOUSING come with Stainless Steel standpipes as a standard feature and through their SCICLONICTM radial flow water entry, water enters the housing to create a cyclonic effect to prevent air entrapment and force water more effectively through the cartridges pleated filter media.

Max. Pressure: 150 psi at 300 °F | Max. Temp. (Housing Only) 250 °F

MODEL NUMBER	DESCRIPTION	IN / OUT	DRAINS	MAX FLOW	LIST

## HSC Jumbo High-Flow Filter Cartridge Options

### HYDROSCIENTIFIC™ PLEATED JUMBO CARTRIDGES

are high flow performance cartridges designed to meet and exceed operational requirements in high flow applications. Their 100% Polyester material is ideal for almost every application where a rugged, cleanable and reusable cartridge is required.

### HYDROSCIENTIFIC™ PLEATED JUMBO CARTRIDGES

deliver high flow capability while reducing filter change-outs due to their high dirt holding capacity and increased particle removal. HSC Series Cartridges are surfactant and binder free, incorporate a built-in seal and are available in a wide range of sizes and micron ratings.

MODEL NUMBER	DESCRIPTION	FILTER LENGTH	NOMINAL MICRON RATING	RCMD. FLOW RATE (GPM)	MAX FLOW RATE (GPM)	LIST

# United Water Inc.

## TERMS AND CONDITIONS OF SALE - 2024

**1. ORDERS AND CONTRACTS:** Any statement in an order of contract which modifies United Water Inc. (UWI) Terms and Conditions as set forth here, must first be accepted in writing by UWI. UWI reserves the right to correct clerical or technical errors in documents.

**2. PRICES:** All prices are \$USD F.O.B. our warehouse. Taxes extra. Prices are subject to change without notice. All shipments will be invoiced at prices in effect on date order is placed. All orders accepted subject to credit terms and limits. Past due invoices subject to service charge of 1.5% per month.

**3. FOB POINT:** Vancouver WA. Unless direct from a supplier.

**4. INVOICE TERMS:** Net 30 days following date of Invoice on approved credit. No minimum charge per invoice – all taxes extra. Credit card payments accepted.

**5. MINIMUM ORDERS:** There are no minimum order requirements. Purchase orders should be for case quantities.

**6. FREIGHT POLICY:** Note: Orders must ship to a single address, with a single requested ship date. Each individual PO counts as a separate order. Drop Ship Pallet Shipments must be collect on account.

1. Net Order Value of \$3,000 or more qualifies for FFA
2. Net Order Value under \$3,000 is evaluated by product category based on the following criteria to determine if that portion of the order qualifies for FFA:
  - a. Residential Filtration products/replacement parts: orders over \$1,000 Net Order Value
  - b. Residential Water Treatment products: combined residential orders over \$3,000 Net Order Value
  - c. Commercial Equipment: FOB Vancouver WA

**7. ORDER ACCEPTANCE:** UWI reserves the right to accept or reject all orders. Possession of a price sheet or catalog shall not be construed as an offer to sell the product listed. UWI sells wholesale only to distributors, OEM's, Water Conditioning Dealers and other qualified businesses (Plumbing and Construction Suppliers or Installers, Coffee (OCS), Food Service, Vending & Bottling).

**8. ORDER CONFIRMATIONS:** UWI will confirm all orders by e-mail or fax. It is the purchaser's responsibility to review the order confirmation and immediately notify UWI of any order corrections. Unless otherwise notified, UWI will assume the order is correct and will package and ship the order with the least expensive carrier.

## TERMS AND CONDITIONS OF SALE - 2024 (Cont.)

**10. SHIPPING:** Shipping methods should be specified on purchaser's purchase order; otherwise UWI will ship best method. UWI standard shipping method is UPS Ground or Common Carrier LTL or services are available upon request. Stock items are generally shipped within one day. Special orders, large orders, or items not in stock will require additional lead-time. Items out of stock are automatically backordered and shipped when received.

**11. DELAYS IN SHIPPING:** The purchaser shall not hold UWI responsible for any delay or for any damages suffered by the purchaser by reason of any delay due to fires, strikes, riots, Acts of God, government orders or restrictions, delays in transportation, delays by suppliers of materials or parts, inability to obtain necessary labor, or other caused beyond the control of UWI. In the event of such delay, the shipping date shall be extended for a period equal to the time lost by reason of such delay.

**12. DAMAGE/LOSS IN TRANSIT, ERRORS AND SHORTAGES:** Delivery of goods to a carrier at UWI's warehouse or other shipping point shall constitute delivery. Regardless of freight payment, all risk of loss or damage in transit shall pass to the purchaser at that time. UWI is not responsible for damage, shortage, or loss incurred during transit. Check shipments for damage before acceptance. The purchaser must inspect the goods on arrival from the carrier. Purchaser shall make claims for loss or damage to goods while in transit against the carrier. UWI will assist purchaser in securing satisfactory adjustment of such claims. Claims for errors, shortages, etc. must be made within 5 days of the receipt of goods, otherwise no allowance will be made. WHEN PRODUCTS ARE SHIPPED ON PALLETS, INDIVIDUAL CARTONS MUST BE COUNTED UPON RECEIPT. ANY SHORTAGES OR OTHER DISCREPANCIES MUST BE NOTED ON THE DELIVERY RECEIPT AT THE TIME OF RECEIPT OR CLAIMS WILL BE CONSIDERED WAIVED.

**13. PRICES & QUOTATIONS:** Orders will be invoiced at the prices in effect at time of shipment. Unless otherwise specified, prices are F.O.B. point of shipment. We reserve the right to change prices and quotations without notice.

**14. CHANGED/CANCELLED/MODIFIED ORDERS:** Orders are processed as they are received. Additions may delay the original shipment or may be shipped as a separate order. We reserve the right to assess a 15% cancellation charge for all orders cancelled prior to shipping. Non-stock items cannot be changed and are non-cancellable if noted on the order acknowledgment as such. A purchaser's request for modification or cancellation will not be incorporated into the Agreement unless the request is accepted by UWI in a writing that amends the Agreement.

**15. RETURNED GOODS:** Only new and marketable items with a copy of the invoice and a Return Merchandise Authorization number (RMA) will be accepted. RMA numbers are available by calling customer service and must be requested within 30 days of the invoice date. We reserve the right to assess a 15% restocking charge. Returned merchandise is to be returned freight prepaid. Non-stock items are not returnable if noted on the order acknowledgment as such. Returns accepted within 30 days from date of authorization only.
